

# Integrify Roadmap

# Normalize, Enhance, Polish

- Subtle changes to create a polished design with modernized look
- Make fonts more readable and standardized throughout
- Improve theme colors
- Dark Mode
- Optimized Mobile/Touch Interface
- Each screen layout optimized for functional efficiency
- Already in progress – Done by Q4

# Data Storage and Reporting

- Implement Data Tiering to keep transactional tables small and clean
- Will inherently improve reporting and allow for data retention settings and built in archiving.
- Rework of reporting and how they are stored and executed.
- Already in progress - Completed in phases by 24Q2

# Integration – starting Q3

- Starting Q3 - Done 24Q2
- A task type that will be able to use any swagger/open api based service with easy configuration
- A question type that utilizes an integration source

# Other Enhancements

- Application Notification System – Q3
- Task Stop/Cancel Rules – Q4
- Recognized File Types - Q3
- Grid Question Enhancements – Starting Q4

Make your organization more efficient and productive.
