

MATHCRAFT
SECURITY TECHNOLOGIES, INC.

Leveraging Integrify's Open API Within Custom Applications

By Imo Etuk & Taslim Salisu

MathCraft Security Technologies Inc.

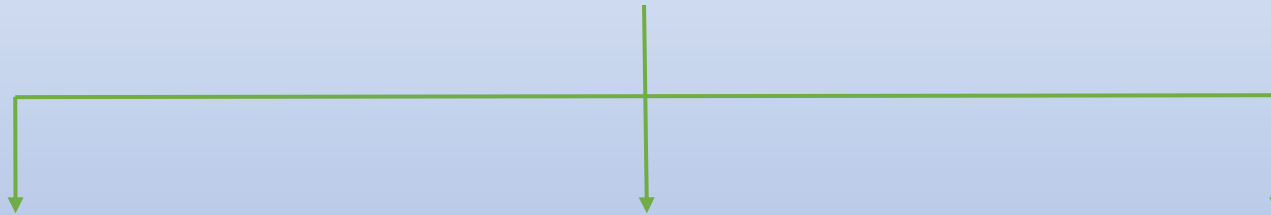

Who We Are

MathCraft Security Technologies provides tools to government and corporate clients to meet security requirements in the management of classified contracts and clearances.

Products

Enterprise Security Suite

Software for Managing
DoD, SAP/SAR and SCI
Security Requirements

Employee Self-Service Portal

Web Based Enterprise Visitor
Management Software

The Challenge

- Diverse customer size with diverse compliance requirements
- No one size fits all solution
- Frequent updates to requirements with new threats
- Accessibility to employee population
- Excellent API documentation
- Good technical support
- Easy adoption of Integrify technology

Conventional Integrify Interface

- Users interact directly with Integrify UI

MathCraft's Implementation

- Embedded Processes and Forms
- Creation of Portal Infrastructure to support our users
- API managed processes
- Requisitions Queue
- Pending Queue

Summary of Integrify APIs

- Ability to extend/super charge the functionalities of Integrify by integration
- Accessibility to large user population
- Thin client UI implementation
- Group and User Management ability from our systems
- Consistent UI interface to users
- Easy adoption of application by user community

Thank You!
